

Wi-Station is one of the newest and fastest Qi wireless chargers in the market. With its sleek, minimal & aluminium design it can fast charge every phone that supports wireless charging in minutes. Most wireless chargers in the market have a 5W transmit power whereas Wi-Station has a 10W transmit power. Samsung S8 and Note 8 need at least 10Watt to fully charge whereas iPhone 8, iPhone 8 Plus & iPhone X need at least 7.5 Watt. Wi-Station can fully fast charge all these brands and many more!

MAIN FEATURES OF WI-STATION

- Made out of premium Aluminium Alloy

- 5-8mm Qi Wireless Charger

- Compatible with iPhone 8, iPhone 8 Plus, iPhone X, Samsung S8, Note 8 and every phone that supports wireless charging

CERTIFICATES UPON REQUEST

CE, FCC & ROHS certificates can be provided if needed

- Output: 5V 2A/9V-1.67A
- Available in three colors: black, gold & red
- Packaging comes with manual + micro-USB cable

ADVANTAGES OF WI-STATION OVER COMPETITORS

- Wi-Station has a sleek & minimal design. It is only 5mm thin and is made over aluminium alloy which means it makes it super light since aluminium is a very light metal, corrosion resistant, has perfect electrical & thermal conductivity and is recyclable
- Most wireless chargers in the market are not safe since they become very hot easily due to their material and easy to burn
- Wi-Station has a 10W transmit power whereas most wireless chargers in the market have a 5W transmit power. For Samsung S8, Note 8 they need 10W and iPhone 8, 8 Plus and iPhone X they need at least 7.5W or else the phones won't fully charge. Wi-Station provides 10W transmit power hence making it more powerful and fast to charge.
- Wi-Station has certificates whereas most wireless chargers in the market don't have any
